Claims 3-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions and/or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 4, 2004.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is considered inaccurate. In the last four lines of claim 1 it is stated that the second contactor has a separate path electrically independent from the first contactor. Usually IC devices have a common aground for power and for information signals. The word "independent" is not understood from the specification or claims and is therefor considered inaccurate. Since claim 2 are dependent on claim 1 claim 2 is considered inaccurate as well.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Faure et al, Frohlich and Yanagi et al are cited to show prior art apparatus wherein plural contactors each with plural contacts are used to test a single device.
